### **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

The following is an Examiner's Statement of Reasons for Allowance: Applicant's claims were initially directed to a wavelength converting method and device (along with a laser machining system incorporating the wavelength converting device) employing a non-linear optical crystal, the output surface of which is in contact with a gaseous ambient containing "less nitrogen than air". After appropriate rejection of the claims as being unpatentable over U.S. Patent 6,002,697 to Govorkov et al (which discloses a non-linear optical crystal in a substantially 100% argon atmosphere) and European Patent EP 1 048 974 A1 to Deki (which discloses a non-linear optical crystal in an inert gas atmosphere such as high purity oxygen, or a mixture of a rare gas and oxygen), applicant substantially amended the claims to specifically exclude: ambient atmospheres consisting of oxygen, ambient atmospheres consisting of one or more rare gases, and ambient atmospheres consisting of oxygen and at least one rare gas. The claim scope now encompasses ambient atmospheres that contain less nitrogen than air, but that do not include the specifically excluded gases/gas mixtures. Examples of ambient atmospheres that are now covered by the claims include a predominantly carbon dioxide atmosphere (present claim 8), and a predominantly argon atmosphere which is not 100% argon, and not argon mixed with other rare gases and/or oxygen (present claim 9). The claims now clearly distinguish from the previously applied references, and further search has uncovered no additional prior art documents that would disclose or suggest the invention as now claimed. The previously applied rejections are, accordingly, withdrawn. Claims 1-20 herein are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning the merits of this communication should be directed to Examiner John D. Lee at telephone number (571) 272-2351. The Examiner's normal work schedule is Tuesday through Friday, 6:30 AM to 5:00 PM. Any inquiry of a general or clerical nature (i.e. a request for a missing form or paper, etc.) should be directed to the Technology Center 2800 receptionist at telephone number (571) 272-1562, to the technical support staff supervisor (Team 8) at telephone number (571) 272-1564, or to the Technology Center 2800 Customer Service Office at telephone number (571) 272-1626.
